布局方式

三栏布局种方式：

1 直接浮动用函数减去

```
* {

    margin: 0;

    padding: 0;

  }

  .father {

    border: 1px solid #000;

  }

  .father .cont-left,

  .father .cont-right {

    width: 200px;

    height: 200px;

```

```
24        background-color: blue;
25
26        float: left;
27
28      }
29
30      .cont-center {
31
32        background-color: pink;
33
34        height: 300px;
35
36        float: left;
37
38        width: calc(100% - 400px);
39
40      }
41
42  </style>
43
44  </head>
45
46  <body>
47
48  <div class="father">
49
50  <div class="cont-left">
51  zuo
52  </div>
53
54  <div class="cont-center">
55  zhong
56  </div>
57
58  <div class="cont-right">
59  you
60  </div>
61
```

```
</div>
```

布局方式2

用绝对定位方式

子元素直接遮住父元素超出部分然后用堆叠层级使父盒子在子盒子底部

```
* {
  margin: 0;
  padding: 0;
}
.father {
  border: 1px solid #000;
  position: relative;
}
.father .cont-left,
.father .cont-right {
  width: 200px;
  height: 200px;
  background-color: blue;
}
.cont-left {
  float: left;
```

```
  }
  .cont-right {
    float: right;
  }
  .cont-center {
    background-color: pink;
    height: 300px;
    position: absolute;
    top: 0;
    left: 200px;
    right: 200px;
    z-index: -1;    // 堆叠层级
  }
</style>
</head>
<body>
<div class="father">
<div class="cont-left">
zuo
</div>
<div class="cont-center">
zhong
</div>
<div class="cont-right">
you
</div>
</div>
```

布局方式三

	margin: 0;
	padding: 0;
	}
	.father {
	border: 1px solid #000;
	}
	.cont-left {
	float: left;
	}
	.cont-right {
	float: right;
	}
	.father .cont-left,
	.father .cont-right {
	width: 200px;
	height: 200px;
	background-color: blue;
	}
	.cont-center {

```
    background-color: pink;
    height: 300px;
    /* 触发了BFC */
    overflow: hidden; //触发bfc的独立区域
  }
</style>
</head>
<body>
<div class="father">
<div class="cont-left">
zuo
</div>
<div class="cont-right">
you
</div>
<div class="cont-center">
zhong
</div>
</div>
```

粘性布局

```
* {
    margin: 0;
    padding: 0;
  }
  html,
  body {
    height: 100%;
  }
  .content {
```

	/* 设置内容得最小高度是100% 可以保证把footer挤出去 */
	min-height: 100%;
	margin-bottom: -80px;
	}
	.content::after {
	content: '';
	display: block;
	height: 80px;
	}
	.footer {
	height: 80px;
	background-color: blue;
	}
	</styl
